Dear Sir:

We take pleasure in handing you herewith special list No. 73, consisting of the largest and finest collection of orchids ever offered. We have included in this list cypripediums also native hardy orchids, both of these classes of plants are gaining constantly in popularity, the former on account of its great variety and easy culture and the latter from the fact that they are hardy, and may be planted out in the gardens and woodlands where they are always interesting and attractive.

The native hardy orchids we can furnish in the spring and fall only.

In ordering, please use number in left margin only, and give number of List.

All those marked × are hybrids.

CYPRIPEDIUM (LADY SLIPPER ORCHID)

The following list of *Cypripediums* is without a doubt the largest and most varied collection of these plants carried by any commercial house in America. Nothing in the entire orchid family offers such a great number of species, varieties and hybrids as do the *Cypripediums*. They are a constant source of interest to the cultivator.

The flowers when cut will outlast anything else we know and besides they are the easiest of all orchids to grow with few exceptions.

In ordering please use number in left margin and give number of List.
